

## ENEL'S ENGAGEMENT IN ASSOCIATIONS INVOLVED IN CLIMATE-POLICY ADVOCACY

Enel is fully committed to the fight against climate change and the full implementation of the Paris Agreement. In such respect, Enel actively engages with the full range of its stakeholders also through its membership in the associations involved in climate related policy advocacy listed below.

### Region: Global

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>1</sup>	Enel's main roles with the association
<b><u>Bettercoal</u></b>	<p>Bettercoal is the internationally recognized standard that works toward a responsible global coal supply chain.</p> <p>Bettercoal assesses coal producers according to the three ESG – Environment, Social and Governance – pillars, according to the criteria set out in its code of conduct, and develops plans for each company it assesses to improve their business practices.</p> <p>Founded by a group of major coal buyers, Bettercoal aims at constant improvements in sustainability practices in coal mining.</p>	The level of alignment with the Paris Agreement was deemed "medium".	Enel is a member of various working groups and is represented on the association's Board.
<b><u>Global Sustainable Electricity Partnership (GSEP)</u></b>	GSEP is a global partnership of global electricity companies at the heart of the electrification revolution. GSEP is mainly focused on advancing the electricity sector. It is built on members' unparalleled expertise in power systems and electricity technologies to empower decision-makers and companies to embrace electricity as the energy of tomorrow.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the CEO Summit and in the association's committees.
<b><u>Global Wind Energy Council (GWEC)</u></b>	The Global Wind Energy Council is the international trade association for wind power industry. Its mission is to ensure that wind power establishes itself as the answer to today's energy challenges, providing substantial environmental and economic benefits.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the association as a member of the Board and also participated in the association's working groups.
<b><u>International Emissions Trading Association (IETA)</u></b>	IETA is a non-profit corporate organization with more than 100 members across companies, geographic areas and disciplines promoting the use of carbon trading as a lever to pursue global climate ambition.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel holds a position on the Board of IETA, contributing to help focus IETA's attention on ensuring the truly sustainable implementation of Emissions Trading systems worldwide. Enel is also active in working groups and task forces.

<sup>1</sup> According to the internal methodology defined by Enel and described in Enel's 2022 Sustainability Report.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>1</sup>	Enel's main roles with the association
<b><u>United Nations Global Compact (UNGC)</u></b>	The UN Global Compact is the largest global corporate sustainability initiative, established with the aim of promoting a sustainable economic model through the development and implementation of sustainable practices and policies.	The level of alignment with the Paris Agreement was deemed "high".	Enel co-chairs the CFO Coalition and is also the Patron of the new Transformational Governance initiative.
<b><u>World Business Council for Sustainable Development (WBCSD)</u></b>	The WBCSD is a global organization led by the CEOs of over 200 international companies working together to accelerate the transition to a net-zero, nature-positive and fairer future.	The level of alignment with the Paris Agreement was deemed "high".	Enel holds the role of Council Member, through the CEO.
<b><u>World Economic Forum (WEF)</u></b>	The World Economic Forum (WEF) is an international non-governmental organization engaging leaders in the political, business, cultural and societal spaces to shape global, regional and industry agendas. The institution carefully blends and balances the best of many kinds of organizations, from both the public and private sectors, international organizations and academic institutions.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the association as member of both working groups as well as several specific ad-hoc initiatives (e.g., International Business Council, Alliance of CEO Climate Leaders, Electricity Industry Governors, First Movers Coalition, Clean Power and Electrification, Net Zero Carbon Cities).
<b><u>Global Alliance for Sustainable Energy</u></b>	Global Alliance for Sustainable Energy is an independent global alliance opened to all stakeholders that recognizes the urgency of addressing the climate emergency according to the 'just transition' principles and the need to promote and embed sustainability and social responsibility in the renewable energy industry.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the association as chairman of the Board, as executive committee representative and also participated in the association's working groups.

## Region: Europe

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>2</sup>	Enel's main roles with the association
<b><u>Eurelectric</u></b>	The Union of the Electricity Industry - Eurelectric is the sector association which represents the common interests of the electricity industry at pan-European level, plus its affiliates and associates on several other continents. The association counts over 34 full members, representing over 3500 companies in Europe.	The level of alignment with the Paris Agreement was deemed "high".	Enel is well represented in the association, with more than 40 delegates from Group companies in Italy, Spain and Romania holding key positions within the association (at decision-making level and in the Committees, such as the Electrification and Sustainability Committee or the Sustainability Working Group).

<sup>2</sup> According to the internal methodology defined by Enel and described in Enel's 2022 Sustainability Report.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>2</sup>	Enel's main roles with the association
<p><b><u>Asociación de Empresas de Energía Eléctrica (AELEC)</u></b></p>	<p>Aelec is the Association of Electric Power Companies, it is widely present in the electricity value chain. Aelec focuses its activity on the dissemination and promotion of the technical and regulated aspects of electricity activities, in particular the role of electricity to integrate renewables, increase energy efficiency and contribute to achieving decarbonization objectives.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated in the association as member of the Board.</p>
<p><b><u>Associazione Nazionale Industriali Gas (Proxigas ex Anigas)</u></b></p>	<p>Proxigas represents the majorities of companies in the natural gas chain, operating in the management of infrastructures (transport, storage, LNG and distribution) and in the commercial activities (import, trading, wholesaling and retailing).</p>	<p>The level of alignment with the Paris Agreement was deemed "medium".</p>	<p>Enel participated in the association as member of the Board and as member of committees.</p>
<p><b><u>Confederación Española de Organizaciones Empresariales (CEOE)</u></b></p>	<p>CEOE is the national business association representing and defending Spanish companies and entrepreneurs. CEOE voluntarily integrates two million companies and freelancers from all business sectors. In Europe, it is an active part of BusinessEurope, which brings together European business associations. It actively supports the international negotiation on climate change, participating in the process and assisting the COP.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Endesa, Enel's Spanish subsidiary, is a member of the commission for industry, international relations, health and consumer affairs, and the finance economy.</p>
<p><b><u>Confindustria</u></b></p>	<p>Confindustria is the main association representing manufacturing and service companies in Italy. Its members include over 150,000 small, medium and large companies. Confindustria's mission is to promote the development of enterprises as the driving force behind the country's economic, social and civil growth.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>In addition to holding important roles in local and national associations, Enel takes part in various technical working groups (most of all, the Energy and Environment Working Groups), seeking to promote activities in line with climate targets.</p>
<p><b><u>CSR Europe</u></b></p>	<p>CSR Europe is the leading European business network for Corporate Social Responsibility. Through its network of around 34 corporate members and 36 National CSR organizations, it gathers over 10,000 companies, and acts as a platform for supporting businesses and industry sectors in their transformation and collaboration towards practical solutions and sustainable growth.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated in the association as member of the Board.</p>
<p><b><u>Elettricità Futura</u></b></p>	<p>Elettricità Futura is the main association of Italian electric utilities. It defends their interests and creates value by supporting the sector in the energy transition process.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel is among the shareholders and actively participated in working groups and technical tables.</p>

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>2</sup>	Enel's main roles with the association
<b><u>European Federation of Energy Traders (EFET)</u></b>	EFET was established in 1999 with the mission of promoting competition, transparency, and open access in the European energy sector.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated in the association as member of several committees.
<b><u>Hellenic Wind Energy Association (HWEA)</u></b>	HWEA is a key wind energy association in Greece with very high leverage on policy and regulatory framework shaping. Very vocal, strong advocacy, participation in all public consultations, organization of events bringing together stakeholders, efforts to prove the biodiversity alignment of wind energy. HWEA is also a Member of Wind Europe.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the association as member of the Board.
<b><u>Kyoto Club</u></b>	Kyoto Club is a non-profit organization, which members are business companies, associations and local municipalities and governments engaged in reaching the greenhouse gas reduction targets set by the Kyoto Protocol, by the EU ones for 2030 and by the December 2015 Paris Agreement.	The level of alignment with the Paris Agreement was deemed "high".	Enel is a member of the Kyoto Club and participates in round tables on renewable development, energy efficiency, environmental education and resilience to climate change.
<b><u>Motus - E</u></b>	Motus-E is the first and most important association in Italy aiming to accelerate the uptake of e-mobility providing policies, best practices, studies and engaging with decision makers. Motus-E is composed by car manufacturer, public and private recharging infrastructure manufacturers and operators, e-mobility service providers, universities, and more.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the association as member of the Board.
<b><u>SmartEn</u></b>	SmartEn is the association of market players promoting decentralized and decarbonized power generation in favor of flexible demand for renewable energy sources.	The level of alignment with the Paris Agreement was deemed "high".	Enel's presence at the top of the association's structure was confirmed in 2022 with its re-election to the Board and to the position of Chair of the Distributed Flexibility Task Force. Enel also participates with experts in the Digital Agenda and e-mobility working groups.
<b><u>SolarPower Europe</u></b>	SolarPower Europe represents organizations active along the entire PV value chain, with the aim of defining the regulatory environment and improving business opportunities for solar photovoltaics in Europe.	The level of alignment with the Paris Agreement was deemed "high".	During 2022, Enel's presence was confirmed within the Board, the Advocacy Committee and through the participation of experts in 12 of the association's 14 Workstreams. Enel continued its work within the Renewable Hydrogen and Electrification Workstream as Chair and Co-Chair of the Industrial Strategy Workstream.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>2</sup>	Enel's main roles with the association
<b><u>Spanish Group for Green Growth</u></b>	The Spanish Group for Green Growth (GECV for its acronym in Spanish) is an association made up of more than 50 companies of various sizes that work together towards a low emission economy.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of association's committees.
<b><u>The Batteries European Partnership Association (BEPA)</u></b>	The Batteries European Partnership Association (BEPA) is the international non-profit making association (AISBL) representing the private side of the BATT4EU Partnership. It gathers the European battery community willing to contribute to the ambitious upcoming Research & Innovation Batteries Partnership under Horizon Europe.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated in the association as member of the Board and as industry chair of several working groups.
<b><u>The European Association for Storage of Energy (EASE)</u></b>	The European Association for Storage of Energy (EASE), located in Brussels, Belgium, is the leading member-supported association representing organizations active across the entire energy storage value chain. EASE supports the deployment of energy storage to support the cost-effective transition to a resilient, climate-neutral, and secure energy system.	The level of alignment with the Paris Agreement was deemed "high".	Enel chairs the association. Enel is also active in the Applications & Economics Working Group.
<b><u>WindEurope</u></b>	WindEurope is the voice of companies and organizations operating in the wind industry. It actively promotes wind energy in Europe and worldwide, has over 450 members and is active in over 40 countries.	The level of alignment with the Paris Agreement was deemed "high".	Enel has participated in the association as a member of the Board and as Chair of the Working Group Market and Investment Working Group; Enel also participates with experts in all the association's working groups.
<b><u>European Heat Pump Association</u></b>	EHPA is the voice of the European heat pump industry in Brussels. The association works to define a European policy that will enable the heat pump industry to prosper and become the first choice for heating and cooling by 2030.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel is a member of various committees and task forces, and participates in a number of working groups.
<b><u>CLUB EXCELENCIA EN SOSTENIBILIDAD</u></b>	Association of 11 leader big companies aimed at disseminating sustainability among the Spanish business community, promoting dialogue with stakeholders and best practice benchmarking.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of several working groups and committees.
<b><u>ASOCIACIÓN ESPAÑOLA DEL PACTO MUNDIAL</u></b>	Spanish brand of Global Compact devoted to creating a global movement for businesses and civil society to build a sustainable society, promoting Global Compact Principles adoption and the achievement of the Agenda 2030.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of several working groups and committees.
<b><u>CONSEJO EMPRESARIAL ESPAÑOL DE DESARROLLO SOSTENIBLE</u></b>	CEO-led community of approximately 50 of the Spanish leading sustainability businesses working collectively to accelerate the system's transformation needed for a net-zero, nature positive, more equitable future.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Spanish Business Council on Sustainable Development.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>2</sup>	Enel's main roles with the association
<p><b><u>Asociación Técnica Española de Climatización y Refrigeración (ATECYR)</u></b></p>	<p>ATECYR is the Spanish Technical Association of Air Conditioning and Refrigeration its mission is to respond to the needs of technicians in the sector of air conditioning, refrigeration and energy efficiency through the transmission of experiences and knowledge in an independent and non-profit, serving as a meeting point for their opinions and concerns to provide society with sustainable solutions.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of several working groups and committees.</p>
<p><b><u>The Association for Decentralised Energy</u></b></p>	<p>The Association for Decentralised Energy is a trade association for decentralised energy in Great Britain, including demand-side flexibility, district heating, and combined heat and power, with over 130 members and an associated research organization.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of working groups</p>
<p><b><u>Energy UK</u></b></p>	<p>Energy UK is a trade association for the British energy industry: retailers, generators, and aggregators.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of several committees.</p>
<p><b><u>European Platform for Corporate Renewable Energy Sourcing (RE-SOURCE)</u></b></p>	<p>The RE-Source Platform is Europe's leading forum for corporate renewable energy sourcing. Through its policy advocacy, wide-ranging and innovative Renewable Energy Buyers Toolkit and popular annual event for energy buyers and sellers, RE-Source seeks to remove barriers for corporates to renewable energy procurement in support of Europe's climate and energy goals.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of committees.</p>
<p><b><u>Platform for electromobility</u></b></p>	<p>The Platform for Electromobility is an organization from across civil society, industries, transport modes that promote electromobility, by establishing a forum in which diverse like-minded organizations collaborate to develop the market for electromobility. The Platform also actively promotes electromobility to key decision makers and influencers in the EU institutions and the EU Member States.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of several working groups.</p>

**Region: North America**

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>3</sup>	Enel's main roles with the association
<b><u>Advanced Energy Economy (AEE)</u></b>	Advanced Energy Economy (AEE) is a national association of businesses that are making the energy we use secure, clean, and affordable. The association works to accelerate the move to 100% clean energy and electrified transportation in the U.S. Advanced energy encompasses a broad range of products and services that constitute the best available technologies for meeting energy needs today and tomorrow.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of the Board.
<b><u>Advanced Energy Economy Institute (AEEI)</u></b>	AEE Institute is engaged at the state, regional, and national levels to educate policymakers about the broad public benefits of advanced energy, and to inform the development and implementation of policies that would expand clean energy and reduce carbon emissions.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of working groups.
<b><u>Advanced Energy Management Alliance (AEMA)</u></b>	AEMA is provider and supporter of Distributed Energy Resources, including Demand Response and Advanced Energy Management, united to overcome barriers to nationwide use of demand-side resources.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of the Board.
<b><u>Advanced Power Alliance (APA)</u></b>	The Advanced Power Alliance is the industry trade association created to promote the development of wind, solar and energy storage as resources that can deliver clean, reliable, affordable power for American consumers.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as chair emeritus.
<b><u>Alliance for Clean Energy New York (ACE-NY)</u></b>	The mission of ACE-NY is to promote the use of clean, renewable electricity technologies and energy efficiency in New York State, in order to increase energy diversity and security, boost economic development, improve public health, and reduce air pollution.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of working groups.
<b><u>American Clean Power Association (ACP)</u></b>	ACP is the voice of companies across the wind, solar, storage, and transmission industries that are powering America's future and providing cost-effective solutions to the climate crisis, while creating jobs, spurring massive investment in the US economy, and driving high-tech innovation across the nation.	The level of alignment with the Paris Agreement was deemed "high".	Enel holds a position on the Board of Directors of ACP.

<sup>3</sup> According to the internal methodology defined by Enel and described in Enel's 2022 Sustainability Report.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>3</sup>	Enel's main roles with the association
<b><u>American Council on Renewable Energy (ACORE)</u></b>	ACORE is meant to be the focal point for collaborative advocacy across the renewable energy sector, supported by members spanning renewable energy technologies and constituencies, including developers, manufacturers, top financial institutions, major corporate renewable energy buyers, grid technology providers, utilities, professional service firms, academic institutions and allied nonprofit groups.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board.
<b><u>Americans for a Clean Energy Grid (ACEG)</u></b>	ACEG's mission is to educate stakeholders and the public to support policies and regulations favoring the expansion, modernization, and integration of the high-voltage electric transmission grid in order to achieve a clean energy economy—one that attains the scientifically-validated global objective of reducing greenhouse gas emissions by 80%.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board.
<b><u>Boston Green Ribbon Commission (BGRC)</u></b>	The Boston Green Ribbon Commission is a group of business, institutional, and civic leaders in Boston working to develop shared strategies for fighting climate change in coordination with the City's Climate Action Plan.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of the Board.
<b><u>Business Council for Sustainable Energy (BCSE)</u></b>	The BCSE is an organization dedicated to implementing market-based approaches to reducing pollution and providing a diverse, secure mix of energy resources.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>California Efficiency &amp; Demand Management Council (CEDMC)</u></b>	CEDMC is a statewide trade association of non-utility companies that provide efficiency, demand response and data analytics products and services in California. CEDMC's mission is to support the advancements of demand side technologies, except for Evs. CEDMC engages in CAISO, CPUC and legislative advocacy for DR, DERs and EE.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>California Energy Storage Alliance (CESA)</u></b>	CESA is a membership-based advocacy group committed to advancing the role of energy storage in the electric power sector. At 100+ members strong, CESA is the definitive voice of energy storage in California and the West. CESA operates as technology and business model-neutral, supported solely by the contributions and coordinated activities of its members. CESA's mission is to advance the adoption of energy storage resources in CA.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>California Solar and Storage Association (CSSA)</u></b>	CSSA advocates on behalf of the distributed solar and storage industry at the CPUC and the legislature.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>3</sup>	Enel's main roles with the association
<p><b><u>Canadian Renewable Energy Association (CanREA)</u></b></p>	<p>The Canadian Renewable Energy Association is the voice for wind energy, solar energy and energy storage solutions that will power Canada's energy future. It works to create the conditions for a modern energy system through stakeholder advocacy and public engagement.</p> <p>The mission is to ensure wind energy, solar energy and energy storage play a central role in transforming Canada's energy mix.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Center for Energy Efficiency &amp; Renewable Technologies (CEERT)</u></b></p>	<p>CEERT advocates on behalf of clean technology adoption, primarily utility-scale solar, wind and BES, along with load management technologies like DR and EE. CEERT is supportive of achieving GHG reduction goals. CEERT's mission is to decarbonize the CA economy through adoption of clean technologies like renewable energy and DERs, but also through building and transportation electrification.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of the Board.</p>
<p><b><u>Clean Energy Buyers Alliance (CEBA)</u></b></p>	<p>The Clean Energy Buyers Association (CEBA) is a membership association for energy customers seeking to procure clean energy across the U.S. The membership of over 300 includes stakeholders from across the commercial and industrial sector, non-profit organizations, as well as energy providers and service providers.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Clean Grid Alliance (CGA)</u></b></p>	<p>Clean Grid Alliance is a non-profit organization whose 40+ members include wind, solar and energy storage developers and manufacturers, non-profit environmental, public interest and clean energy advocacy organizations, farmer organizations, and other businesses that support renewable energy.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Colorado Independent Energy Association (CEIA)</u></b></p>	<p>CEIA advocates on behalf of the solar and storage industry in Colorado. Its goal is to move CO toward 100% clean energy.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Colorado Solar &amp; Storage Association (CSSA)</u></b></p>	<p>Established in 1989, the Colorado Solar and Storage Association is the award-winning nonprofit association leading Colorado's solar and storage industries. The mission is to expand solar and storage markets and to generate jobs and prosperity for the people of Colorado.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Edison Electric Institute (EEI)</u></b></p>	<p>The Edison Electric Institute (EEI) is the association representing all investor-owned US electricity companies.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium".</p>	<p>Enel participated as member of several working groups.</p>

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>3</sup>	Enel's main roles with the association
<b><u>Electric Drive Transportation Association (EDTA)</u></b>	The Electric Drive Transportation Association (EDTA) is the trade association promoting battery, hybrid, plug-in hybrid and fuel cell electric drive technologies and infrastructure. Their membership includes vehicle and equipment manufacturers, energy companies, technology developers, component suppliers, government agencies and others.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Electric Vehicle Charging Association (EVCA)</u></b>	EVCA advocates on behalf of increasing electric vehicle adoption and for policies supportive of electric vehicle charging.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board and as member of several working groups.
<b><u>Environmental Markets Association (EMA)</u></b>	The Environmental Markets Association (EMA) is a non-profit trade association that brings together diverse perspectives together to advance the application of market-based solutions.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Interwest Energy Alliance (IEA)</u></b>	Interwest advocates on behalf of renewable energy development, clean energy policies, reduced GHG and an integrated western market.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board.
<b><u>Michigan Energy Innovation Business Council (MEIBC)</u></b>	Michigan EIBC is the only trade association dedicated to and focused on companies doing business across Michigan's advanced energy economy.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Mid-Atlantic Renewable Energy Coalition (MAREC)</u></b>	MAREC advocates for renewable energy and is an organization consisting of wind and solar developers/manufacturers dedicated to the growth of renewable energy technologies in the Mid-Atlantic region.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board.
<b><u>Northeast Clean Energy Council, Inc. (NCEC)</u></b>	NCEC advocates at the legislative and regulatory levels on behalf of the clean energy industry in New England and New York.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Ontario Energy Association (OEA)</u></b>	The Ontario Energy Association (OEA) is the credible and trusted voice of the energy sector. It is an integral and influential part of energy policy development and decision making in Ontario. It represents Ontario's energy leaders that span the full diversity of the energy industry.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Renew Missouri (RM)</u></b>	Renew Missouri was founded in 2006 to advance renewable energy and energy efficiency in the state of Missouri. In that time, Renew Missouri has advanced legislation, passed statewide ballot initiatives, crafted local ordinances, and represented these interests before state regulators on hundreds of cases.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of working groups.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>3</sup>	Enel's main roles with the association
<b><u>RENEW Northeast (RNE)</u></b>	RNE provides high-level technical expertise on clean energy policy development in New England and New York.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Renewable Energy Wildlife Institute (REWI)</u></b>	REWI is a groundbreaking partnership among leaders in the wind industry, science and environmental organizations, and wildlife management agencies whose mission is to address wind energy & wildlife challenges. This allows for the safe deployment of renewables alongside wildlife.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Renewable Northwest (RNW)</u></b>	RNW advocates on behalf of renewable energy development, clean energy policies, reduced GHG and an integrated western market.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Silicon Valley Leadership Group (SVLG)</u></b>	SVLG advocates on behalf of the Silicon Valley Companies, including energy technology companies.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Solar Energy and Storage Association - Puerto Rico (SESA-PR)</u></b>	SESA advocates solar and storage technologies as a central solution to the energy needs of Puerto Rico and promotes public policy that will benefit the growth of these industries. SESA brings awareness and understanding of these technologies to both government policymakers and the public and facilitates collectively beneficial collaboration and good business practices within the industry.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Solar Energy Industries Association (SEIA)</u></b>	The Solar Energy Industries Association (SEIA) is the national trade association for the solar and solar + storage industries. SEIA advocates policies that will enable solar to reach 30% of US electricity generation by 2030, to create jobs in every community, and to establish fair market rules that promote competition and the growth of reliable, low-cost solar power.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of several working groups.
<b><u>Sustainable Brands (SB)</u></b>	Sustainable Brands is the premier global community of brand innovators who are shaping the future of commerce worldwide. Since 2006, our goal has been to inspire, engage, and equip business leaders and practitioners who see social and environmental challenges as an essential driver of brand innovation, value creation, and positive impact.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Utah Clean Energy (UCE)</u></b>	UCE advances Utah's clean energy transition and leads and accelerates the clean energy transformation with vision and expertise.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of working groups.
<b><u>Utility-Scale Solar Energy Coalition</u></b>	USSEC-OH advocates for the continued development of utility-scale solar projects in Ohio.	The level of alignment with the Paris Agreement was	Enel participated as member of working groups.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>3</sup>	Enel's main roles with the association
<b><u>of Ohio (USSEC-OH)</u></b>		deemed "medium/high".	
<b><u>Zero Emission Transportation Association (ZETA)</u></b>	ZETA is the first industry-backed coalition of its kind advocating for the full adoption of electric vehicles (EV) by 2030, which will create hundreds of thousands of new jobs, secure American global EV manufacturing leadership, dramatically improve public health and significantly reduce carbon pollution.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board.
<b><u>Asociacion Mexicana de Energia Eolica A.C. (AMDEE)</u></b>	AMDEE was born in 2005 to promote the generation and development of wind energy in Mexico, representing the developers of wind projects before the authorities, economic sectors and society in general. It seeks to be an international benchmark for the wind sector in America and the electricity sector in Mexico in technical, legal, regulatory, environmental, ethical, and financial aspects, contributing to the generation of energy through clean sources that are sustainable and inclusive in the development of the Mexican economy.	The level of alignment with the Paris Agreement was deemed "high".	
<b><u>Asociacion Mexicana de Energia Solar Fotovoltaica A.C. (ASOLMEX)</u></b>	ASOLMEX was created in May 2014 with the purpose of promoting the development of photovoltaic solar electric power generation nationwide. ASOLMEX integrates more than a hundred companies related to all segments of the value chain, both for distributed and large-scale generation. They represent their associates before government, industrial, social organizations, the media, and national and international audiences. Promote spaces for dialogue, analysis and agreement that allow the identification of collective actions that maximize the benefit for our associates, as well as the formation of alliances with the public, private and social sectors to face the challenges and take advantage of the opportunities of the sector.	The level of alignment with the Paris Agreement was deemed "high".	
<b><u>Asociacion Mexicana de Energia (AME)</u></b>	Currently, the Association is made up of 16 leading companies in the energy industry, which represent 33,000 MW of installed capacity for electricity generation, which represents more than 38% of the total capacity in the country, with more than 25 billion investment dollars. The companies that make up the AME join significantly through the development of cleaner technologies such as efficient cogeneration and renewable energy with wind and photovoltaic plants.	The level of alignment with the Paris Agreement was deemed "medium".	Enel participated as member of the Board.

Region: LATAM

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>4</sup>	Enel's main roles with the association
<b><u>Assocarbono</u></b>	Assocarbono is a Colombian Association of Carbon Market Actors focused on the development and strengthening of the carbon market and public policy advocacy, cultural, scientific, technological and innovation activities in the environmental and sustainable development sector.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of several committees.
<b><u>Asociación de Energías Renovables Colombia (SER COLOMBIA)</u></b>	SER is a private non-profit entity, created in March 2016, which brings together more than 70 companies locally and globally, which are committed to the implementation and development of non-conventional renewable energies in Colombia. Its associates contribute all their experience and knowledge from different points of view (generators, developers, suppliers and consultants) in favor of strengthening the country's energy matrix.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of several committees.
<b><u>Associação Brasileira de Veículos Elétricos (ABVE)</u></b>	The Brazilian Association of the Electric Vehicle is a civil association of private law, without economic purposes, which prioritizes the performance with the authorities and business entities related to the automotive sector, aiming at taking decisions that encourage the development and use of electric vehicles (EVs).	The level of alignment with the Paris Agreement was deemed "medium".	Enel participated as member of the Board.
<b><u>Red Argentina de Pacto Global</u></b>	Red Argentina de Pacto Global is the largest initiative of corporate social responsibility in the country, with over 900 participants with a presence in 20 provinces. Its objective is to mobilize the business sector and other stakeholders to commit to the 10 universal principles of the United Nations and to undertake the purpose of contributing to the solution of the greatest challenges facing the planet and humanity between now and 2030: the Sustainable Development Goals approved by the United Nations General Assembly in September 2015.	The level of alignment with the Paris Agreement was deemed "high".	Enel is a member of various working groups and actively participates in a number of workshops.
<b><u>Associação Brasileira de Gereção de Energia Limpa (ABRAGEL)</u></b>	The association promotes the union of small and medium-sized electricity producers, companies, entities, and associations active the energy market. It represents its associates before public authorities, including the Judiciary, and national and international bodies and institutions.	The level of alignment with the Paris Agreement was deemed "medium/high".	Enel participated as member of working groups.

<sup>4</sup> According to the internal methodology defined by Enel and described in Enel's 2022 Sustainability Report.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>4</sup>	Enel's main roles with the association
<p><b><u>Associação Brasileira de Energia Eólica (ABEEólica)</u></b></p>	<p>The association defends the implementation of the wind source in the electric matrix, and, for that, it has acted in a permanent and strategic way, together with different institutions, to promote the competitiveness and sustainability of the national wind sector.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of several committees.</p>
<p><b><u>Associação Brasileira de Energia Solar Fotovoltaica (ABSOLAR)</u></b></p>	<p>The association coordinates, represents and defends the interests of its members regarding the development of the market and the sector, promoting and publicizing photovoltaic solar energy in the country. Representation before the executive, legislative and judicial powers</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of several committees.</p>
<p><b><u>Instituto Acende Brasil</u></b></p>	<p>Instituto Acende Brasil is a study center dedicated to the development of actions and projects to increase the degree of Transparency and Sustainability of the Brazilian Electricity Sector, consolidating projects that permanently study sectoral themes that require an analytical discipline focused on the long term and that present high degree of interdependence.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Instituto Rede Brasil do Pacto Global</u></b></p>	<p>The UN Brazil Global Compact is a platform that brings together the business sector to act with a measurable impact on the SDGs, both in the evolution of business models and in the implementation of partnership projects. It is formed through a non-profit association that works in partnership with the headquarters of the Global Compact through the signing of a Memorandum of Understanding.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of working groups.</p>
<p><b><u>Associação da Indústria de Cogeração de Energia (COGEN)</u></b></p>	<p>COGEN is a non-profit association whose objective is to promote integration and cooperation among its members in order to implement and strengthen the energy cogeneration industry in the country. The objectives are to evaluate the scenario for the promotion of Distributed Generation, with emphasis on bioelectricity and to identify restrictions that prevent dynamizing the offer and contracting of GD.</p>	<p>The level of alignment with the Paris Agreement was deemed "medium/high".</p>	<p>Enel participated as member of working groups.</p>

Region: APAC

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>5</sup>	Enel's main roles with the association
<b><u>Clean Energy Council (CEC)</u></b>	CEC is the spearhead of the clean energy industry in Australia. It represents hundreds of leading companies operating in the solar, wind, energy efficiency, hydro, bioenergy, energy storage, geothermal and marine sectors, along with over 5,800 solar installers as members.	The level of alignment with the Paris Agreement was deemed "high".	Enel is a key member with a strategic presence in important working groups and committees, such as the Policy and Advocacy Advisory Committee.
<b><u>FICCI Renewable Energy CEO Council</u></b>	The association aim is to provide strategic direction for long term sustainability and growth of the renewable energy sector and for supporting the Government in achieving energy security by enhancing the integration of renewable energy in the country's energy mix. Council members are CEOs of RE developers, which meet in a regular basis to drive and raise issues on energy transition.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups and committees.
<b><u>Korea New &amp; Renewable Energy Association (KNREA)</u></b>	KNRE is a non-profit organization founded in 2001 to boost the renewable energy industry and ultimately the national economy through promoting technology development and exports of renewable energy in Korea. More than 480 members including developers, equipment manufacturers, suppliers, etc.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Korea Wind Energy Industry Association (KWEIA)</u></b>	KWEIA founded in 2007 for the Korea wind industry at large to accomplish a sustainable growth to play as a key representative of the Korea wind power industry. The organization of various companies and related organization that consist of the domestic wind industrial circles including power generation, manufacturing, development, construction, etc.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of subcommittees.
<b><u>National Solar Energy Federation of India (NSEFI)</u></b>	The association's goals are to make solar energy affordable, contribute to mitigate global warming and climate change, strive to achieve universe energy access and sustainable development. It's a member driven organization, advocating solar policy in India through increased awareness, simplification of policies and regulations, conducting periodic seminars / workshops on awareness of policies on solar energy.	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of the Board, of several committees and working groups.

<sup>5</sup> According to the internal methodology defined by Enel and described in Enel's 2022 Sustainability Report.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>5</sup>	Enel's main roles with the association
<b><u>European Business Council Energy Committee</u></b>	<p>EBC currently represents around 2,500 European companies and individuals, which become its members of it through their respective national chambers of commerce or business organizations.</p> <p>Many of these companies participate directly in one or more of the EBC's many sectoral committees, whose work covers a wide variety of economic sectors.</p> <p>The EBC consists of 22 sectoral committees, whose work aims to improve the local business environment in a wide range of economic sectors.</p>	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of several committees and working groups.

**Region: Africa**

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>6</sup>	Enel's main roles with the association
<b><u>Africa Infrastructure Development Association (AFIDA)</u></b>	<p>The Africa Infrastructure Development Association (AFIDA) is an association of project developers that seeks to promote and enable project development activities in Africa, by creating an eco-system and platform that will foster continuous dialogue amongst its members, standardize project development template documents and serve as a policy advocacy platform for the industry, with a view to ensuring that more projects on the continent achieve bankability.</p>	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Energy Federation Morocco</u></b>	<p>The role of the energy federation is to represent and defend the interests of its members vis-à-vis public authorities and partners and to contribute to the national and international debate on energy policy.</p>	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as member of working groups.
<b><u>Electricity Sector Association of Kenya (ESAK)</u></b>	<p>The Electricity Sector Association of Kenya (ESAK) was founded in 2019. ESAK is a member-based organization composed of stakeholders in the electricity sector ranging from Independent Power Producers (IPPs), project developers, consultants, contractors, legal practitioners, finance organizations all working across different sub sectors of the electricity space in Kenya.</p>	The level of alignment with the Paris Agreement was deemed "high".	Enel participated as vice chairperson.

<sup>6</sup> According to the internal methodology defined by Enel and described in Enel's 2022 Sustainability Report.

Name of the Association	Description	Level of alignment with the Paris Agreement <sup>6</sup>	Enel's main roles with the association
<p><b><u>RES4Africa Foundation</u></b></p>	<p>RES4Africa brings together a network of international leaders from across the clean energy value chain and supports the creation of an enabling environment for renewable energy investments and strategic partnerships. RES4Africa serves as a bridge between members and partners in emerging markets to exchange perspectives and expertise.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel is one of the financing partners and holds the presidency of the association, which is held by the current CEO of Enel Green Power.</p>
<p><b><u>South Africa PV Industry Association (SAPVIA)</u></b></p>	<p>SAPVIA is an association focused on promotion of cohesion, collaboration, and consistency in solar PV industry. SAPVIA seeks to influence government by positioning PV as energy option that is least cost option; provide insights through sharing best practice through market analysis to support policy making.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of several committees.</p>
<p><b><u>South Africa Wind Energy Association (SAWEA)</u></b></p>	<p>SAWEA is a wind energy association representing wind energy interests in South Africa. The association is focused on advocacy for wind power investment, excellent operational practices and promotion of large- and small-scale renewable power applications.</p>	<p>The level of alignment with the Paris Agreement was deemed "high".</p>	<p>Enel participated as member of the Board and as member of several working groups.</p>
