ENEL GREEN POWER AWARDED WITH 40 MW OF OPERATING HYDRO CAPACITY IN BRAZIL CONCESSION AUCTION

- *Enel Green Power won 30-year concession for two operating hydro power plants: Paranapanema (32 MW), located in São Paulo state, and Mourão I (8 MW), located in Parana state*
- *The 70% of the energy generated by the two facilities will be sold to a pool of distribution companies and the remaining 30% will be sold on the free market, as per auction rules*
- *EGP will be investing more than 160 million reais (approx. 40 million US dollars) for this concession*

Rome and Rio de Janeiro, November 26th, 2015 – Enel Green Power (“EGP”) has been awarded a 30-year concession for two operating hydro power plants with a total installed capacity of 40 MW in Brazil, following the “Leilão de Concessões” public tender held on November 25th. The two hydro power plants are Paranapanema (32 MW), located in São Paulo state, and Mourão I (8 MW), located in Parana state, and together they are able to generate approximately 270 GWh per year.

The two facilities are supported by 30-year supply contracts which provide for the sale of 70% of the energy generated by the two plants to a pool of distribution companies, while the remaining 30% will be sold on the free market, as per auction rules.

EGP will be investing more than 160 million reais (approx. 40 million US dollars) for this concession and will be in charge for the operation of the plants over the next 30 years.

The awarding of this concession consolidates EGP’s position as one of the main players in the renewable sector in Brazil, where the company currently runs 93 MW of hydro capacity, 313 MW of wind and 12 MW of solar. The awarding represents a further step in EGP’s strategy aimed at implementing a technologically well-balanced portfolio in the country.

***Enel Green Power** is the Enel Group company fully dedicated to the international development and management of renewable energy sources, with operations in Europe, the Americas, Africa and Asia. With a generation capacity that corresponds to approximately 32 billion kWh in 2014 from water, sun, wind and the Earth’s heat – enough to meet the energy needs of more than 11 million households – Enel Green Power is a world leader in the sector thanks to its well-balanced generation mix that provides generation volumes well over the sector average. The company has an installed capacity of more than 10,600 MW from a mix of sources including wind, solar, hydropower, geothermal and biomass. The company has about 760 plants operating in 17 countries.*

*In **Latin America**, Enel Green Power runs renewable energy plants in Brazil, Chile, Costa Rica, Guatemala, Mexico, Panama and Uruguay that have a total installed capacity of more than 2,000 MW.*
